DETAILED ACTION

Election/Restrictions

Applicant's election of Species I: Claims 1-13 in the Response filed 1/07/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without** traverse (MPEP § 818.03(a)).

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Arthur Steiner on 03/05/2004.

The application has been amended as follows:

Claim 14 has been cancelled.

The Abstract has been amended in order to be limited to a single paragraph which is generally the proper form. The abstract now read as follows:

Art Unit: 2872

The present invention provides a different optical element having superior optical characteristics. A polycrystalline substrate having crystal grains whose sizes are not more than $1\mu\text{m}$ or an amorphous phase at the dry-etched surface thereof, or an upper film layer 8 formed on a polycrystalline substrate 1 being the same materials as that of the polycrystalline substrate 1, which has finer crystal grains than-those of the substrate. The upper film layer 8 is dry etched, and AR coat 6 is formed thereon.

Reasons for Allowance

Claims 1-13 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest a polycrystalline substrate, wherein the upper film being the same material as the substrate, and having finer crystal grains compared with crystal grains of the substrate or having an amorphous structure as set forth in the claimed combination.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hiroyuki et al. (JP 10-300912 A): The reference teaches an amorphous silicon layer being deposited on single crystal

Art Unit: 2872

silicon. The reference does not teach or render obvious the substrate being a polycrystalline substrate.

The Examiner notes that the single crystal silicon taught in the prior art and the claimed polycrystalline substrate have different optical properties.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fayez G. Assaf whose telephone number is (571) 272-2307. The examiner can normally be reached on 8-5 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on (571) 272-2312. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
